Technical features

Outdoor aluminium structures with a cover, manually adjustable sunshade blades. Depending on the inclination, it is possible to control the sunlight and the degree of natural ventilation of the environment below, thus adjusting the temperature. The aluminum structure is characterized by horizontal beams, perpendicular to the legs, which do not require inclination for rainwater drainage. The cover drains the meteoric water to the perimeter structure and the gutters adjacent to the perimeter bring water into the internal drain to the legs.

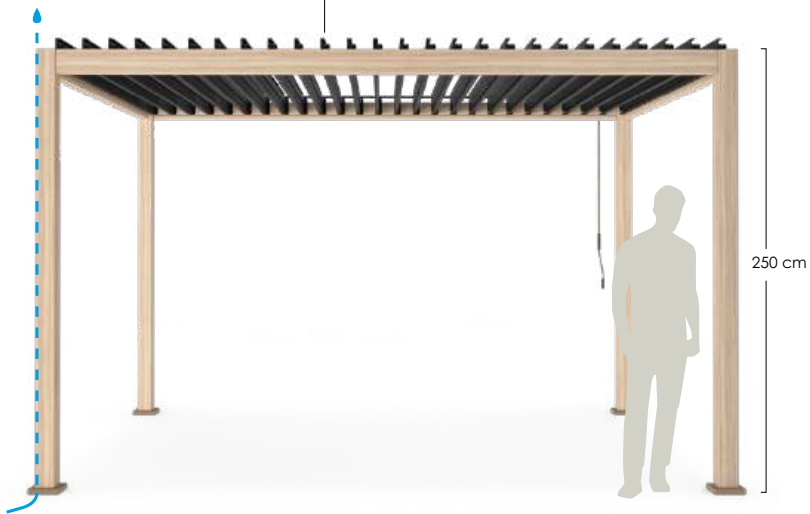

Available in 4 colour variants, Tyger® powder coating (polyester), a world leader since 1930, offers excellent colour holding performance, corrosion resistance, perfect coating adhesion, yellowing stability and prolonged gloss retention.

Integrated water drainage system

Ocean

The Ocean series is designed to respond in a simple and functional way to the desire to live open air spaces with maximum freedom, combining two benefits: protection and possibility of opening.

With a quick and silent movement, Ocean's sunshade blades rotate creating a comfortable environment.
